Mohammad Khalayleh

Graduate Computer Engineer

PROJECT EXPERIENCE

FPGA-Based Cryptographic Accelerator | Graduation Project
Al-Quds University | 2026

- Designed and implemented hardware accelerators for **AES-128 in CTR** mode and **SHA-256** on an Intel Cyclone V FPGA.
- Developed RTL modules using SystemVerilog and verified functionality through simulation in ModelSim.
- Synthesized and deployed the design using Quartus Prime Lite on the DE10-Standard FPGA board.
- Created testbenches, analyzed simulation waveforms and debugged RTL behavior.

MassBill ERP System

Web Developer - Math Academy

- Building an ERP application for managing finance, accounting, transactions and assets in Multiple Languages.
- Working with development team.
- Technologies: React JS, Bootstrap, Node JS , Firebase.

EDUCATION

Al-Quds University | 2021-2026

Bachelor of Science in Computer Engineering

- Five-year Computer Engineering programme
- Cumulative average:84.3
- Dean's List: 3 semesters

Mälardalen University | Erasmus+ Exchange
Västerås, Sweden | Jan - Jun 2025

Courses:

- Programming of Reliable Embedded Systems
- Artificial Intelligence
- Cybersecurity Operations

CERTIFICATES

Web Design Certification | 2026
freeCodeCamp

Quality Assurance Certificate | 2024
Analiza Education Center

IEEE Certificate | 2024
IEEEXtreme 18.0 programming competition

Front End Development Certification | 2022
Full-Stack MATH Academy

TECHNICAL SKILLS

Programming Languages: C, Java, Python, JavaScript, SQL, Verilog

Software Development: Object-Oriented Programming, Data Structures, Problem Solving, REST APIs

Embedded Systems & Hardware: FPGA Development, Digital Logic Design, RTL Design

Networking: TCP/IP, OSI Model, DHCP, DNS, VLANs, Routing, Switching, Firewalls, FortiGate

LANGUAGES

- **Arabic**: (Native)
- **English**: (Intermediate)
- **Hebrew:** (Intermediate)
